HELLO FROM

YMD 105

Hi! My name is Jelena.
I am taking this course as part of my major.
I am at that point in life when switching a career becomes an actual thing.
My current wish is to become an UX designer.

THE WRONG AMAZON IS BURNING
THE WRONG ICE IS MELTING

I was very excited about my first digital design project. First tool we started using was famous Photoshop. I didn't have any previous experience in the program but was very eager to learn.
I wanted to send a strong message and I think I was quite successful in that.

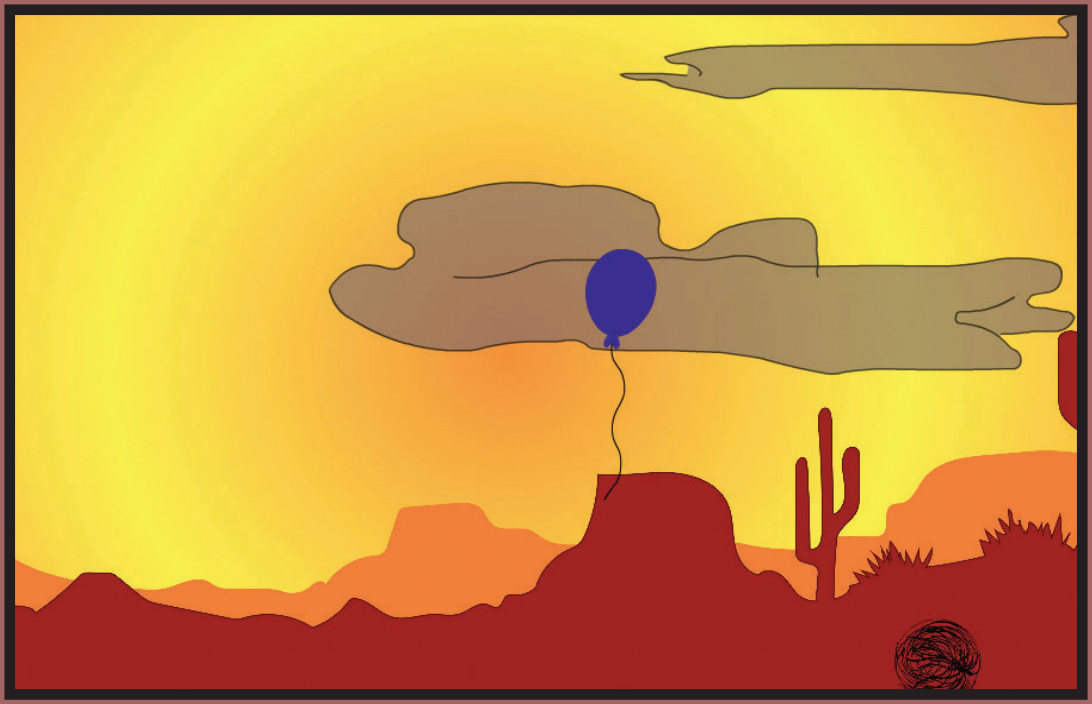
PHOTOSHOP FINAL PROJECT WRONG

THE
JUNGLE
PROTECTOR

Working in Illustrator was quite challenging for me. Since I was a kid I've been using computer mouse with my right hand but am left-handed, so drawing with my weaker hand wasn't very succesfull for me. On the top of that I chose one of my nephews drawings to use as a templete and then the end result wasn't that pleasing. Next time I will play smarter.

ILLUSTRATOR FINAL PROJECT

THE JUNGLE PROTECTOR



What I've learned doing an animation project is that it is very time consuming. It was very challenging and complex project. Having more time and better understanding of tools would definitely help me to get the better results. But at the end I have to say that I've made my first animation and I am proud of it.
